

Digethra Token (\$DTH) Whitepaper

Version 1.0 - October 2025

Abstract

Digethra (\$DTH) is a utility token built on the Binance Smart Chain (BEP-20) designed to revolutionize the gaming industry. Our vision is to create a decentralized, fair, and community-driven gaming ecosystem where players have true ownership of their digital assets and developers can build sustainable games. With a total supply of 500,000,000 \$DTH, this token will be the backbone of our upcoming gaming platform, NFT marketplace, and governance system.

1. Introduction: The Problem & Our Solution

1.1. Problems in the Traditional Gaming Industry

The global gaming industry is worth billions, yet its current models often disadvantage players:

- **False Ownership:** Players spend money and time on in-game items (skins, weapons, characters) but do not truly own them. These assets are tied to a single game and can be lost if an account is banned or the game's servers are shut down.
- **Closed Economies:** In-game items cannot be easily traded outside of their respective game's ecosystem, limiting their real-world value.
- **Lack of Community Involvement:** Critical decisions about game development are often made centrally by developers without involving the voice of their loyal player community.
- **Unfair Monetization:** *Pay-to-win* models often create an imbalance where players who spend more gain an unfair advantage.

1.2. The Digethra Solution: A New Era of Decentralized Gaming

Digethra aims to solve these problems by harnessing the power of blockchain technology:

- **True Asset Ownership:** By using Non-Fungible Tokens (NFTs), every in-game item becomes a unique, player-owned asset on the blockchain. These assets can be traded, sold, or used across different games within the Digethra ecosystem.
- **Open Economy:** The \$DTH token serves as a universal currency throughout the ecosystem, facilitating seamless asset trading in a decentralized marketplace.
- **Community Governance (DAO):** \$DTH token holders will have voting rights to influence key decisions regarding the ecosystem's development, such as new game features, fund allocation, and partnerships.
- **Play-to-Earn (P2E) Model:** We will integrate mechanisms where players can earn real rewards (\$DTH and NFTs) simply by playing, creating a more equitable and sustainable economic model.
- **Investor Security Guarantee:** We understand the concerns of investing in crypto assets. Therefore, we are introducing a buyback system at a guaranteed price of \$0.005 USDT

per token. This mechanism is designed to provide a safety net for our early investors should the project not develop as expected.

2. Digethra (\$DTH) Token Details

- **Token Name:** Digethra Token
- **Ticker:** \$DTH
- **Token Standard:** BEP-20
- **Blockchain:** Binance Smart Chain (BSC)
- **Max Total Supply:** 500,000,000 \$DTH
- **Contract Address:** (To be announced after the audit is complete)

3. Tokenomics and Fund Allocation

The total supply of 500,000,000 \$DTH is strategically distributed to ensure long-term growth, ecosystem stability, and community rewards.

! [DTH Token Allocation Chart]

Category	Allocation (%)	Number of Tokens	Description
Presale	20%	100,000,000	Sold to early investors via a dedicated DApp at a fixed price of \$0.01 USDT per \$DTH . Funds from the presale will be used for initial development, security audits, and marketing. During this period, several mini-games will be launched on the DApp to increase community engagement and provide early utility for the token. To protect our early investors, we provide a buyback guarantee at a price of \$0.005 USDT per \$DTH .
Community Airdrop	10%	50,000,000	Distributed to early community members who participate in

			marketing campaigns, complete promotional tasks, and help build awareness for the Digethra project. This is our way of showing appreciation for early supporters.
Team & Founders	15%	75,000,000	Allocated to the core team, developers, and founders as a long-term incentive. These tokens will be subject to a <i>vesting</i> period: locked for 6 months after the public launch, then released linearly over the following 24 months. This ensures the team's commitment to the project's success.
Ecosystem & Community Rewards	25%	125,000,000	This fund is the heart of the Digethra ecosystem. It will be used for: <ul style="list-style-type: none"> - Staking Rewards: To reward token holders who lock their \$DTH. - Game Utility: Prizes in tournaments, play-to-earn incentives, and loyalty programs. - Developer Grants: To fund third-party developers who wish to build games within the Digethra ecosystem.
Public Sale & Liquidity	30%	150,000,000	Allocated to provide initial liquidity on decentralized exchanges

			(DEX) like PancakeSwap. A portion will also be reserved for listing fees on centralized exchanges (CEX) in the future, ensuring a healthy market and easy access for public investors.

4. Roadmap

Our roadmap is structured realistically to achieve key milestones in the development of the Digethra ecosystem.

Phase 1: Launch & Foundation Building (Q4 2025)

-  Official Website Launch & Whitepaper v1.0 Publication.
-  Smart Contract Security Audit by a reputable firm.
-  Launch of the Presale DApp with mini-game integration.
-  Commencement of the Community Airdrop campaign to build an initial user base.
-  Establishment of official community channels on Telegram, Discord, and Twitter.

Phase 2: Public Launch & Ecosystem Development (Q1 2026)

-  \$DTH Token Launch on PancakeSwap and initial liquidity lock.
-  Launch of the Staking Platform v1.0, allowing token holders to earn passive rewards.
-  Start of development for the first flagship game under the Digethra banner.
-  Announcement of strategic partnerships with gaming influencers and crypto communities.

Phase 3: Utility & Community Expansion (Q2 2026)

-  Alpha version launch of the flagship game for community testing.
-  Development and launch of the NFT Marketplace for in-game asset trading.
-  Hosting the first official gaming tournament with \$DTH prizes.
-  Initiating the exploration process for listing on a mid-tier centralized exchange (CEX).

Phase 4: Governance & Full Decentralization (Q3 2026 and Beyond)

-  Implementation of the Governance System (DAO), where \$DTH holders can vote on development proposals.
-  Beta version launch of the flagship game with more features.
-  Securing the first CEX listing.
-  Launching a grant program to attract external developers to build on the Digethra ecosystem.

- 🕒 Full launch of the flagship game and global expansion.

5. Our Team (Example)

- **[CEO's Name] - Chief Executive Officer:** Over 10 years of experience in product management in the tech industry with a deep passion for blockchain innovation.
- **[CTO's Name] - Chief Technology Officer:** A blockchain architect with a track record of building secure and scalable decentralized applications (DApps).
- **[CMO's Name] - Chief Marketing Officer:** A digital marketing strategist specializing in community building and brand growth in the Web3 space.

6. Disclaimer

This whitepaper is for informational purposes only and does not constitute a prospectus or investment offer. Investing in cryptocurrency assets carries a high level of risk, including the risk of losing the entire investment amount. Potential investors should conduct their own research (DYOR - Do Your Own Research) and consult with a financial advisor before making any investment decisions. The Digethra team is not liable for any losses arising from participation in this project.
